

HEATING, VENTILATING AND AIR CONDITIONING

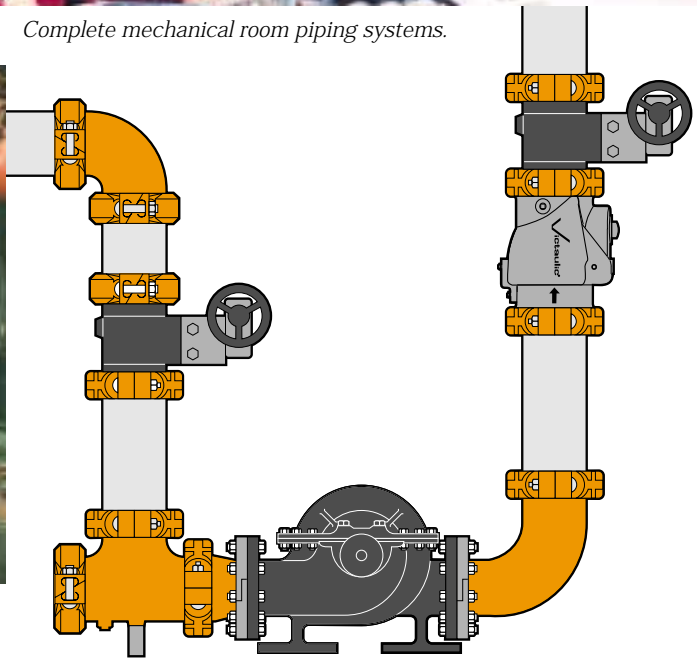

- Chilled water
- Air conditioning systems
- Cooling tower piping
- Machinery rooms
- Condenser water
- Pump dressing
- Ice storage
- Hydronic heating systems
- Underground services

Complete mechanical room piping systems.

Total systems design from pumps and equipment to supply, return and related systems.

Automated valves for heating and cooling flow control.

Automated valves, strainers and other accessories.

Circuit balancing valves for precise zone control heating/cooling.

Large diameter up to 48" (1219.2 mm).

The Pressfit® System speeds small pipe installation.
