

MUNICIPAL TREATMENT

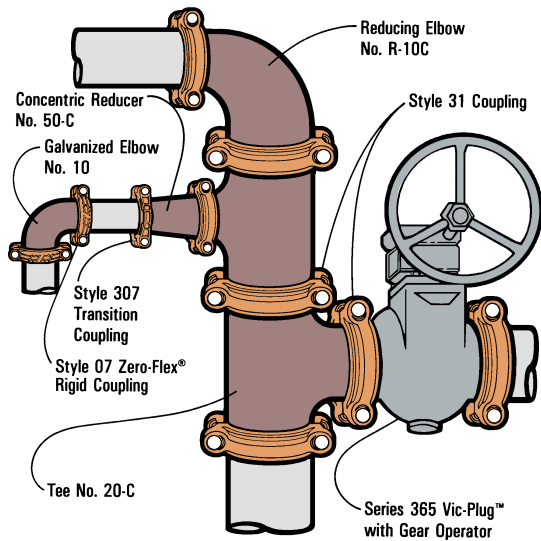

- Water supply lines
- Outfalls/intakes
- Sludge lines
- Equipment piping
- Grit conveyor
- Digester air
- Slurry lines
- Wash lines
- Chemical feed
- Treated water
- Service lines
- Utility piping

Double grooved Duo-Lock™ couplings provide high pressure compatibility for sludge cake piping systems.

Large diameter valve settings are faster, easier, lighter and much more compact.

Vic-Plug™ valves provide grooved end assembly ease with manual or automated control as needed.

Sewage, water treatment, and compressed air are among typical services with Victaulic stainless steel systems.

Couplings as large as 102" (2590.8 mm) have been used for large infalls, outfalls and treatment plant piping.
