

## OTHER SERVICES

- Bridge and dam
- Dredging
- Special processes
- Temporary wastes
- Emergency piping
- Underwater

*Special processes and unique configurations are easily assembled with the grooved system.*

*The grooved system eases tunnel piping, absorbs vibration and accommodates thermal movement.*

*From PVC to steel, stainless, aluminum, HDPE, copper, ductile iron, lined, coated and specialty piping – the grooved system is the economical way.*

*Marine shipboard piping utilizes rigid and flexible couplings to accommodate special needs.*

*Naturally flexibility takes curves in stride.*

*Great for dredging lines, hose-to-pipe transitions.*
